- **Key Features**

- Remote real-time monitoring of temperature and humidity via WiFi — ideal for refrigeration, cold-chain or storage environment.
- Wide measurement range: from -40°F to $+176^{\circ}\text{F}$ (approximately -40°C to $+80^{\circ}\text{C}$) for temperature.
- External temperature & humidity probe: allows sensor placement where you need it (inside cabinet, room, container) while keeping the logger accessible.
- Cloud data storage with free service tier: access, monitor and manage your data via browser/app from anywhere.
- Alarm notifications via SMS / Email / App / Web whenever the measured parameters go out of preset limits.
- Offline data logging / buffer capability: continues to record when network is down and uploads when restored.¹
- Compact, installation-friendly: mountable via bracket or magnet, suitable for fridges/freezers/cold rooms.
