## Overview

RCW-800W series is a IoT recorder that communicates through WIFI network, which is used for real-time monitoring, recording, alarming and data uploading of ambient temperature/humidity. The recorder is mainly composed of a temperature/humidity sensor and a host instrument. It directly transmits the measured value to the Elitech cold cloud through the Wi-Fi network. It can be stored in the Elitech cold cloud anytime, anywhere through mobile phones and PCs with internet access functions. View and analyze the data in the cloud platform. After the limit is exceeded, the alarm can be sent in time through SMS, email and other methods.

## Features

Small size, stylish shape, magnetic tray design, easy to install

Large-size TFT color screen display

Built-in rechargeable lithium battery, can still provide real-time data upload for a long time after power failure

The product is suitable for warehouses, cold storage, refrigerated trucks, cool cabinets, medicine cabinets, freezer laboratories and other scenarios
